

Nordic Innovation Mobility Mission

Welcome to our smart mobility workshop series: Sea Meets Land

In 2019, Nor-Shipping and Nordic Innovation will arrange three regional cross-industry workshops together to spur new Nordic collaboration.

We need your expertise to:

- Collect input on the theme for the Mobility Mission.
- Develop ideas for future Nordic smart mobility projects
- Mobilise potential project partners and collaborators

Are you an ocean industries actor interested in the topic of smart mobility and connectivity? Do you want to be part of shaping tomorrow's ocean solutions today? Then we want to hear from you! Please request an invitation by sending an email to seameetsland@nor-shipping.com.

Why Sea Meets Land?

Nor-Shipping and Nordic Innovation have partnered to help facilitate the new Nordic Innovation Mobility Mission: Sea Meets Land. This is a funding instrument aimed at supporting innovation and collaboration between land-based and ocean industries. The Mobility Mission is part of Nordic Innovation's NOK 60 million Nordic Smart Mobility and Connectivity programme in 2018–2021. This important programme supports UN's Sustainable Development Goals (SDGs) 9 (industry, innovation and infrastructure) and 11 (sustainable cities and communities), and Nor-Shipping's involvement reflect their commitment to the SDG and UN Global Compact, as well as resonating with their blue economy efforts.
